

DMX-R100 Automation Editor S/W Version History

Version 1.10

Feature Additions

- The OVERVIEW GUI has a MASTERS Page in addition to channels 1-24 and 25-48.
- A MANUAL GROUP function is available in the FADER GROUP Page.

Version 1.02

Bugs Fixed

- The font changed to a Universal ANSI style font. The font in the previous version could, in some cases, be substituted for fonts which lacked appropriate characters.

Version 1.01

Bugs fixed

- Fix for incorrectly displayed EQ and Dynamics graphs. This bug relates to the Windows 'Regional Settings Properties', accessed from the Control Panel.

Decimal symbol: . (Period)

Negative number format: -1.1

If Regional Settings for the above entries were set other than as above, EQ and Dynamics graphs would be displayed incorrectly.

The default settings for MS Windows issued in France and Germany differ from the above.
